

2016-07-28

Present: Digit Project Manager
Ethan Marrs
Nathan Begbie

Agenda

- Discuss possibility of starting new repo
- What's happening on a time scale
- Create use cases and link to them screens
 - Clarify what they need to be able to do

Meeting

Day -

Get 3 questions if they're up to date or they get as many questions that they haven't done, in that week.

Gamification -

Week -

Release new content related to a content schedule (currently defined as a 'week' within a module module)

Point made about students cheating on content - (trade off between getting old content and preventing cheating) you're only cheating if students are not up to date.

L - can release content over a month? 'Ramp up' the content, so that content is served over a **month** (as an example) what we essentially want is a 'content window' over which content is served.

At the end of every week, users are awarded airtime. In this case, a week is Monday to Sunday. And this is not nec every week. It is only when a weeks worth of content is live.

Idea - put in a button that students can use to say whether they've covered the question in class.

Month - is pretty much irrelevant to the platform

Term - Define a term as a period in which we serve content. it's not defined within the code, but 'exists' when modules exists week by week.

Holiday - during the holiday, students are not given airtime rewards, but CAN do revision work.

Currently we have content for holidays between 1st and 2nd and 3rd and 4th terms, so we wouldn't define a 'holiday' then. Students would still get airtime rewards.

Year - Every year

'Graduate students' - at the moment this a manual process

Need to define school/course structure better and then circle back to this. Probably out of scope

Content window - is variable, but thinking about a month - can start at beginning of year as a single week, then two, etc until it's a month. When content falls out of the window - it is longer eligible to be counted for airtime rewards, but can be accessed if the students want to do revision questions.

L - 'is there a way a student could revise questions from a particular topic?'

Yes, we could serve questions up from a particular topic.

L - 'you should be able to do all of your questions' so that you can practice again.

Define: revision work - being able to redo ALL of the questions that you have done that counted toward points/airtime as well as the questions that you missed because the student wasn't up to date. **Note that this is different to the way things are currently done**

Note for leaderboards - they are determined by time brackets. 2 weeks, 3 months, all-time.
