Demo'd the toolbar

Feedback:

Limited functionality so hard to give too much feedback

Good that you have TrevorJS type style started

Still needs move, delete etc.

Does it post to a server? No

Can see buttons are there to indicate that functionality existed, but they don't actually work yet, do they? Maybe leave them out for now I found that confusing.

This color scheme is not great.

Difficult to know if good job was done if there is no final file
